

Recruitment summary

The summary shows the recruitment numbers to date of eligible G1 participants. These numbers are updated regularly and the date at which they are correct is shown. Please note that these numbers cannot be used to calculate a response rate because the numbers include invites sent up to and including the date the figures are published and therefore there will have been no opportunity for the participant to respond.

Focus clinic visit attendance summary

Shows how those who have been recruited have progressed through subsequent data collection points. Given the relatively small numbers to date and different

time
