

**Professor  
Anthony  
Bryk**

## Master class - Getting ideas into action: Integrating research and practice in networked improvement communities in education

Professor Anthony Bryk will be facilitating a master class for leading practitioners in the Design-Educational Engineering and Development (DEED) approach to school improvement. This improvement research allows systems to address shared complex problems with all stakeholders, rapidly prototyping improvements and harnessing the emerging collective intelligence to facilitate organisational learning. The Master class will communicate the key ideas of DEED as an improvement science and will provide opportunities for participants to explore its application to particular complex issues drawn from education.

### Facilitator

Professor Anthony Bryk (President of the Carnegie Foundation for the Advancement of Teaching)

### Date

Wednesday 21st May 9:30 am - 4 pm

### Venue

Systems Centre  
Knowledge Exchange Suite  
Merchant Venturers Building  
BS8 1UB

### Registration

Applications to Dr. Ruth Deakin Crick  
25 places available. Cost £95 pp
