All of us from CAPC Teaching wish you a Happy Easter

MB21 The new undergraduate medical curriculum at Bristol

A new undergraduate medical curriculum is currently being developed. One of the aims is better integration of science and clinical learning in all years. Case based learning will be one of the main teaching strategies to facilitate this. The new curriculum will start in 2017-18 with Year 1. Other years will be phased in one by one so that from the academic year 2022-23 the entire new curriculum will be in force. There will be some changes to other years before 2022. From 2017-18 onwards it is planned that Year 5 students will have 4 weeks in Primary Care instead of the current 2 weeks. We will keep you informed via this newsletter and roadshows planned for later this year.

You said, we did

At our recent teaching meeting we heard from your GP academy leads and GP Year leads that student behaviour when they are seeing patients seems to have deteriorated in relation to mobile phone use, dress code and snacking. We have fed this back to Nigel Rawlinson the Director for Student Affairs who will feed this back to each year group.

Please make sure that you set 'ground rules' for your students at the start of their attachments with you and at the start of your sessions.

If students do not respond to your feedback and their behaviour continues to be unprofessional you may need to complete a student concern form. You can find the forms here

New Teachers' Workshop Tuesday 19th April 1.30-5pm at Canynge Hall (address above), Bristol

This workshop is suitable for qualified GPs who are new to teaching or have done very little student teaching in the past. There will be an overview of current GP student teaching in Years 1-5 and of changes for the future. You will learn transferable teaching skills. To book please email phc-teaching@bristol.ac.uk

Severn Faculty RCGP Gala Dinner Friday 10th June 2016

Clifton Pavilion at Bristol Zoo Gardens, College Road, Clifton, Bristol, BS8 3HH
"Opening our eyes to Global Health—a philosophy of universal values"

Don't miss this talk by **Professor Val Wass** OBE, a GP with an interest in Global Medicine and Chair of the RCGP International Committee! Why not make it an evening out with friends and colleagues and book your table now. Your ticket includes free viewing of outdoor Zoo enclosures and gardens from 18:00-19:30, a Reception drink and a Three Course Dinner with drinks and coffee from 19:30.

To book go to <http://www.rcgp.org.uk/learning/wales-and-south-west-england/severn-faculty/severn-faculty-rcgp-gala-dinner-2016.aspx>
