Don't miss this exciting day!

Teaching workshop questionnaire— more answers

Out of 64 respondents 40 or more liked the following about our workshops:

- Year specific workshops
- Workshops which focus on a topic
- Engineers' Hse as a venue
- Whole days
- Certificate of attendance
- Reflective template
- Workshop report
- Handouts of articles etc

We plan to continue with the above.

The Procedure Logbook from Sian Goodson

This is a new initiative to ensure that all students are competent in the core skills required by the GMC. Future students will be issued a hard copy of this book in Year 2 and will need to become competent and get signed off as they are going through the course.

Year 4 students helping with audits

You have got the ideas but no time? Why not supervise a year 4 **SSC** (student selected component)? Students can choose to do an audit for their SSC. They have a 3 week block to complete their SSC from 9th to 27th July 2012. Your role would be to facilitate data collection, supervise and mark the SSC. The payment for this work is £430. For further details please visit <http://www.bristol.ac.uk/primaryhealthcare/teachingundergraduate/ssc/audit.html> or contact david.memel@bristol.ac.uk to discuss things further

The procedure logbook continued

The current fourth years will need to complete their log books between now and the end of their fifth year. Each student has their own paper copy of the log book. A PDF copy will be emailed to practices shortly.

There is a check list for each clinical skill, explaining clearly each step in the process that the students should demonstrate. Any qualified health professional can sign the log book e.g. a practice nurse could sign off a student correctly performing an IM injection. Some competencies have to be signed off several times and more than one signature will be required. Many of the competencies are suitable to be taught and assessed in Primary Care. Please could you aim to observe your current and future students completing the following skills (depending on the year they are in)

- Correct temperature measurement
- Pregnancy testing
- Temperature measurement
- Pulse and BP
- Oxygen saturation measurement
- Venepuncture
- Peak flow measurement
- Urinalysis
- Pregnancy testing (if possible)
- IM injections
- Instructions for inhaler use

As the current fourth years are disadvantaged by having only just received their log books please could you make an extra effort to sign off as many skills as possible.

Many thanks for your help with this. We hope you will agree that this will be a useful record for students and, we hope, not overly time consuming for you as teachers.

The Bristol curriculum has 6 vertical themes

- CAPS—Consultation and procedural skills (**procedural skills logbook**)
- WPC—Medical Humanities and Whole Person Care
- EBM—Evidence Based Medicine and Public Health
- PAID—Personal and (Inter) Professional Development
- Ethics
- 3D—Disability, Disadvantage, Diversity
