## Shape and share your views on critical energy challenges

Global Energy Systems 2013 will focus on providing key insights required by companies, organisations and investors under pressure from the changing energy situation. This information will inform risk assessments and strategic decision-making in light of current high energy prices and energy system vulnerabilities.

### Day 1 | Fossil Fuels: Can we turn Unconventional into Conventional?

Keynote address: Lord Ron Oxburgh, House of Lords UK Parliament.

The limits to easily accessible fossil fuels | Frontier fossil fuel technologies and basins | Panel debate: energy scarcity, threat of fiction?

### Day 2 | The Future of the Electricity System

Keynote address: Dr Jeremy Leggett, Non-Executive Chairman Solarcentury, Chairman SolarAid.

The viability of nuclear power | The challenges of a renewables based electricity grid | Debate: Where to invest in the electricity system of the future—the choice between shale gas, nuclear, renewables, and coal with CCS.

### Day 3 | The Economics and Policy of Energy Systems

Keynote address: Professor Sir David King, Former Director Smith School Oxford University.

Understanding energy supply, demand, price, and the role of policies | Panel discussion on key knowledge, data and policy gaps in the energy sphere | Energy modelling workshop.
