

## Bobby Stuijzand

Advanced statistical methods to analyse eye movements

*ESRC funded PhD (submitted October 2016)*

Two challenges for analysis:

- Individual
- Time Series

Two techniques investigated

- Hidden Markov models (see below)
- Multilevel models

Fifteen-year-old boy shot in both legs in Coleraine  
Baby death: Natasha Sultan to be sentenced for killing daughter  
BBC to test freelance staff over tax  
Morning-after drink-driving arrests 'increase'  
Vast Antarctic iceberg 'could threaten shipping'  
Badger cull: Documents raise new questions  
Hundreds of Britons in foreign jails over drug offences  
Probation officers set to strike over privatisation  
Judge releases Afghan 'execution' audio  
Church of England synod to debate women bishops
