Safety-Netting Coding Tool (SaNCoT)^{1, 2} **Medical Notes Edition. Version 2.1**

Screening for safety-netting advice

Inclusion Criteria	Exclusion Criteria
Safety-netting advice: "Information shared with a patient or their carer designed to help them identify the need to seek further medical help if their condition fails to improve, changes or if they have concerns about their health." Edwards et al. 2019 ¹	Planned (non-conditional follow-up) – occurs regardless of what happens to patient, • "rv in 2 weeks"
 Most will be conditional (if x) + course of action (do y) If (x) happens then do (y) where (y) = seeking some form of medical help Often documented as "y if x" e.g. "review if not settling", "Call 999 if chest pains" Examples Conditional (if x) + course of action (do y) "If gets chest pain call 999" "Inb in 2 weeks for review" Explained other options x, y, z AND if fails reconsult or similar If x then for investigation that Dr has to request "if cough still there in 2 weeks for CXR" 	 Contingent on an investigation result "If anaemic then for 2ww" Contingent self-care including delayed prescriptions (key difference is patient not advised to seek further MEDICAL help, instead to self care) "inb tomorrow start abx (delayed rx given)" "If rash returns use cream again" "if ankle swelling from amlodipine then
 Course of action + conditional "do y if x" "Review inb 2 weeks" "See sos" / "review sos" / "See inb" 	stop"Contingent admin"added to repeat rx so can request prn"
 Conditional warning only "Red flags highlighted" /" advice re: red flags to look out for" "Safety-netting advice given" Abbreviations: inb = if not better, s/e = side effects, rv = review, SOS = save our souls (meaning) 	 'Advice' without further instruction "Advice re: s/e" Ig depends on context), prn = as required

Double click on the 'Blank database' to see the data fields

Import for your data into these fields if applicable

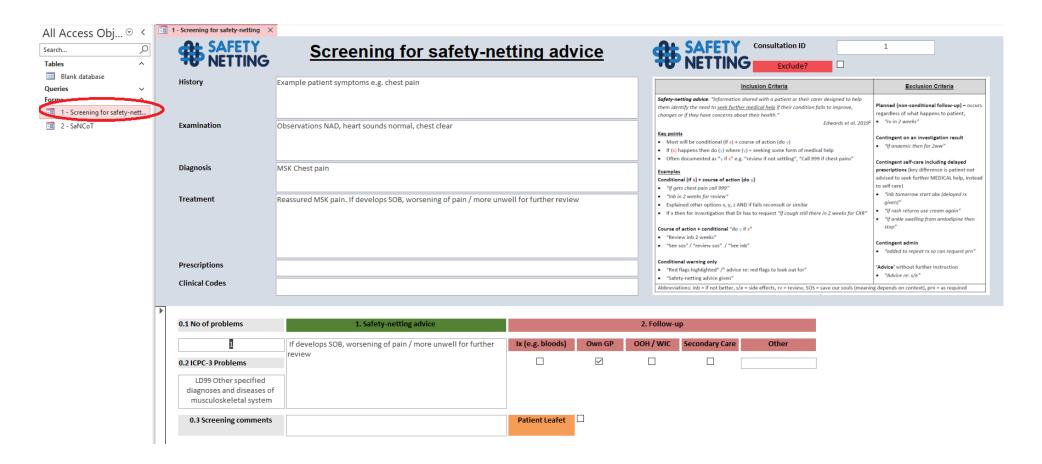

1	Field Name	Data Type
Ħ	consultation_id	Number
	safety_netting_advice_text	Long Text
	clinical_codes	Short Text
	history	Long Text
	examination	Long Text
	diagnosis	Long Text
	treatment	Long Text
	prescriptions	Short Text
	contact_type	Short Text

These fields are generated in the coding tool

	Field Name	Data Type

Screening & all consultation coding

All consultations should be screened for safety-netting advice, unconditional follow-up, and if a patient information leaflet was issued. Also record the number of problems within the consultation and code them using the International Classification of Primary Care 3rd Edition (ICPC-3) browser.

Level 0 – Problem Administration Codes

Title	Code	Data Type	Explanation	Example
Consultation ID		Number	Your unique consultation ID	
Exclude	Yes/No	Tick-box	If you want to exclude any consultation tick this box	Consultation with no text Consultation with data corruption errors
O.1 Number of problems How many problems are documented in this consultation?	1 - 10	Number (integer)	How many problems are assessed in this consultation as coded using the Complex Consultation Tool? ³ A problem is defined as the answer to the question 'what is wrong?'	2
0.2 ICPC-3 Problem codes Code Short-text		Insert ICPC-3 Code ⁴ Use diagnostic categories where available.	Chest pain thought to be caused by angina = KD66.02 Stable angina Shortness of breath caused by COPD = RD68 Chronic obstructive pulmonary disease and emphysema	
0.3 Screening comments (optional)	ODTIONAL I Free-Text I ODTIONA		Optional code to add comments about screening	Difficult case – requires second reviewer / discussion
Patient Leaflet	Yes/No	Tick-box	Is there evidence a patient information leaflet or link to information website was given to patient.	"PIL on constipation issued", "leaflet on bronchiolitis"

1. Safety-netting advice

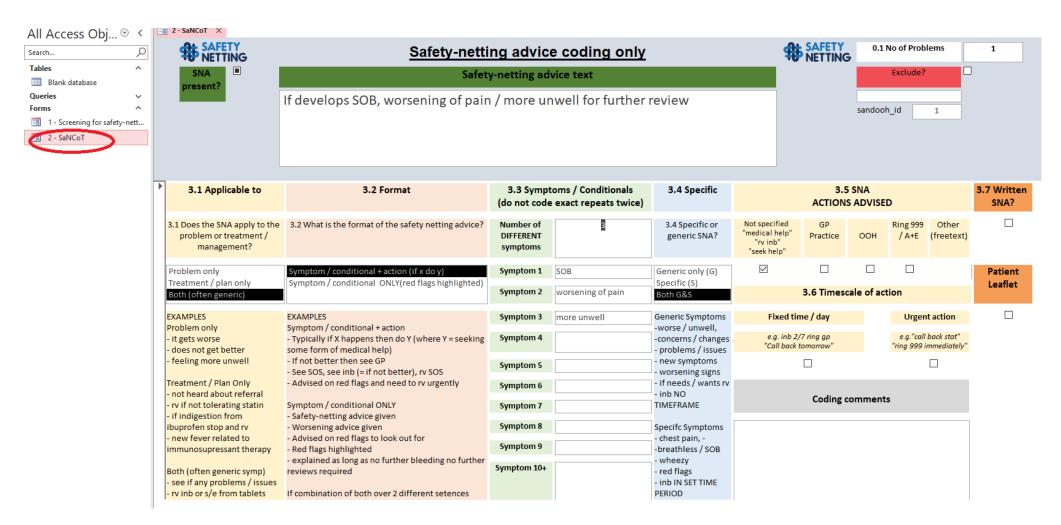

If develops SOB, worsening of pain / more unwell for further review

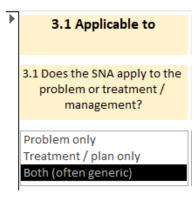

Level 1 – Safety-netting screening							
Title	Codes	Data Type	Explanation	Example			
			copy and paste text of safety-netting advice If this box is empty this will be recorded as no safety-netting advice present in the consultation				
1. Safety-netting advice Text of safety-netting advice present in the notes		Long text	Note, in previous editions we had an additional tick box for safety-netting present/absent but this was potentially introducing errors where people forgot to tick the box. The preferred method for counting if SNA present is to check if this code has text in it or not.	"rv inb" "If develops SOB, worsening of pain / more unwell for further review" "see gp inb 3 days"			

2. Follow-up							
Ix (e.g. bloods)	Own GP	OOH / WIC	Secondary Care	Other			
	\square						

Level 2 – Follow-up codes							
Title	Title Code Type		Explanation	Example			
2. Follow-up	None			Leave all tick boxes blank			
Is there evidence in this	Ix (e.g. bloods)	Tick-box	Investigations only – not seeing a person	'Drop off urine mane for MC+S' "await repeat K+ level"			
consultation that there is follow-up arranged for	Own GP	Tick-box	Follow up arrangements with own GP practice. This many include different members of the primary care MDT e.g. nurse, physio etc – not jut GPs	"fu GP" "see gp next week"			
this problem? Follow-up (unlike safety- netting advice) is an unconditional review of a	OOH / WIC	Tick-box	Follow up arrangements with the out of hours services / walk in centres (WIC)	"attend WIC mane for f2f review"			
	Secondary Care	Tick-box	Follow up arrangements with secondary care services	"patient to attend eye hospital mane" "patient to contact cardiologist and update them"			
problem.	Other	Free- text	Follow up arrangements with any services not listed above	"district nurses arranged to change dressing" "call midwifes mane"			

Safety-netting advice coding

Title	Options	Data Type	Explanation	Example
	Problem	List: choose one option	Safety-netting advice applies to the problem directly. Code treatment failure here.	"see inb in 2 weeks" Common conditionals that just apply to the problem include: Symptoms persisting Worsening Feeling more unwell
3.1 Applicable to Does safety-netting advice apply to the	-	List:	Advice only refers to treatment / management plan e.g. warning of side effects AND to seek medical help OR if	"if indigestion from ibuprofen stop and rv ?trial opioid" (note if patient just told to stop then NOT coded as safety-netting advice as no direction to seek medical help)
problem or a treatment / management plan for the problem?	/ Plan only	choose one option	not heard about a referral Do not include just discussions about side effects of medication if no indication to seek medical help.	"rv if not tolerating s/e from statin" "must seek urgent medical help if develops fever" e.g. in patient newly starting immunosuppressant therapy / chemotherapy
				"if not heard about 2ww then must call hospital number"
	Both	List: choose	Generic and unclear if for treatment or problem	"see if any problems"
	Botti	one option	or separate advice for both included.	"rv inb or s/e from tablets"

3.2 Format

3.2 What is the format of the safety netting advice?

Symptom / conditional + action (if x do y)

Symptom / conditional ONLY(red flags highlighted)

Title	Options	Data Type	Explanation	Example
3.2 Format What is the format of the safety-netting advice?	Symptom / conditional + action	List: choose one option	Conditional (if x) + course of action (do y) If (x) happens then do (y) (y) = seeking some form of medical help Can be documented as course of action + conditional "do y if x"	 Conditional (if x) + course of action (do y) "If gets chest pain call 999" "Inb in 2 weeks for review" Explained other options x, y, z AND if fails reconsult or similar If x then for investigation that Dr has to request "if cough still there in 2 weeks for CXR" Course of action + conditional "do y if x" "Review inb 2 weeks" "See sos" / "review sos" / "See inb"
	Symptom / conditional ONLY	List: choose one option	Documents that gave safety- netting advice or the red flags for patient to look out for but does not write any form of action / where hey should seek help	"Red flags highlighted" "advice re: red flags to look out for" "Safety-netting advice given" "explained as long as no further bleeding no further reviews required"

3.3 Symptoms / Conditionals (do not code exact repeats twice)					
Number of DIFFERENT symptoms	3				
Symptom 1	SOB				
Symptom 2	worsening of pain				
Symptom 3	more unwell				

Title	Options	Data Type	Explanation	Example
3.3 Symptoms / Conditionals How many DIFFERENT (do not code duplicates) symptoms	0-20	Number (integer)	Count how many symptoms / conditions are listed. Individual examples: 'rash', 'wheeze', 'chest pain', 'any problems', 'changes', 'concerns' Code specific symptom persisting as one condition e.g. "If the rectal bleeding is persisting see me again" = 1 condition.	"If becomes <u>unwell</u> , e.g. <u>feverish</u> , <u>SOB</u> , <u>wheezy</u> then for rv" = 4
/ conditionals are documented in the SNA?	1 per box, if 10 or more separate with;	Free text	Insert free text of conditions / symptoms. Separate each element with Note number of conditions should match with 6.1	Unwell Feverish SOB Wheezy If 10 or more: unwell; fever; wheezy

3.4 Specific

3.4 Specific or generic SNA?

Generic only (G) Specific (S) Both G&S

Title	Options	Data Type	Explanation	Example
3.4 Specific	Generic only	List: choose one option	Conditionals that are not specific to one problem (see examples). To code as generic ALL conditionals must fit generic criteria. Symptoms persist / treatment	"Worse", "worsening" (includes if 'X' gets worse where X is the presenting symptom) "Any concerns", "problems", "issues", "worried" "anything changes", "Want to talk further", Wellness deteriorates e.g. "feel unwell" "If it's not getting better for review"
Do the conditionals meet the criteria for being classified as generic or specific?	Specific only	List: choose one option	Any <u>new</u> symptom that is not listed as generic above Symptoms persist / treatment failure <u>with time course</u> explained.	"Chest pains", "Shortness of breath", "wheezy" "If it's not getting better in 2 weeks for review"
	Both	List: choose one option	Both Generic and specific SNA	"See if not better in 2 weeks or worse"

3.5 SNA ACTIONS ADVISED				
Not specified "medical help" "rv inb" "seek help"	GP Practice	ООН	Ring 999 / A+E	Other (freetext)

Title	Options	Data Type	Explanation	Example
	None	Leave all blank	No action advised e.g. conditional only.	"safety-netting advice given" "red flags to look out for highlighted"
3.5 Action advised	Not specified	Tick-box	Location not specific	"rv inb" "see inb"
	GP Practice	Tick-box	Contact patients own GP practice.	"see gp inb"
Where is the patient advised to seek help?	ООН	Tick-box	Contact out of hours services. Includes 111	"if worse over weekend contact 111"
(Tick all that apply)	999 / A&E	Tick-box	Ring 999, go straight to A&E.	"If chest pain >5min must call 999"
	Other	Free-text	Anything that does not fit into above categories	"see pharmacist inb" "call midwife if still unwell tomorrow" "call consultant inb tomorrow"

3.6 Timescale of action					
Fixed time / day	Urgent action				
e.g. inb 2/7 ring gp "Call back tomorrow"	e.g."call back stat" "ring 999 immediately"				

Title	Options	Data Type	Explanation	Example
3.6 Timescale of action	Not specified	Leave all blank	No timescale of action specified. Note: unspecified times such as sooner coded here with exception of urgent action.	"rv inb"
What is the timescale of the action advised?	Named day / fixed time period	Tick-box	Return on named day or fixed period of time e.g. by the end of the week.	"see inb in 2 weeks"
	Immediate / urgent	Tick-box	Contact medical help straight away / urgently.	"see stat if unwell" "see inb in 2 weeks or stat if unwell"

3.7 Written SNA?

Patient Leaflet

Title	Options	Data Type	Explanation	Example
3.7 Written safety-	No	Leave all blank	No evidence patient was given written safety- netting advice leaflet	
netting advice present Is the patient given written safety-netting advice?	Yes / clear evidence	Tick-box	Evidence of written safety-netting advice. Given Patient information leaflet (PIL) and documents that PIL contains red flags / safety-netting advice. Evidence that texted patient safety-netting advice	"highlighted red flags as per PIL" "highlighted red flags as per patient info leaflet given to patient" texted patient safety-netting advice "wrote down red flags to patient to look out for"
	Generic PIL / Unclear	Tick-box	Documents that gave written advice Just documents that given PIL e.g. automated insertion when leaflet printed (see example)	"given PIL on back pain" Mentor topic printed: Tennis Elbow,
Patient Leaflet (note should come up in screening section)	Yes/No	Tick-box	Is there evidence a patient information leaflet or link to information website was given to patient.	"PIL on constipation issued", "leaflet on bronchiolitis"
