Dear Dr Lassiter

Study name: Evaluation of patient access to medical test result services in general Practice

Short Title: Access Study

CPMS ID: 39455

IRAS No.: 249637

I am writing to confirm that the NIHR Clinical Research Network: West of England (CRN: West England) will fund the costs identified in your application for primary care NHS Service Support Costs (SSCs) for the above study.

The funding available reflects the costs recognised in your application form and totals £234.70 for the duration of the study. The rate/s agreed are as follows:

Rate Description	Reimbursement rate
Preparation for database search, database search and eligibility checking	£46.94

The SSC reimbursement template will be sent to you one month before the start of each quarter. **It will need to be completed and returned to the CRN: West of England by the start of each quarter i.e. April, July, October and January.** The activity reported will be multiplied by the relevant rate detailed above and will result in a payment to the appropriate GP practice in the CRN: West of England locality.

The above payments will be reimbursed to the participating GP practices on a quarterly basis, in arrears and on receipt of a completed 'Service Support Costs Reimbursement Return' (when necessary) and provided the GP Practice has entered into the contract that is now required by the Department of Health for all partner organisations receiving network funding.

If you require further information, please contact us on the details below:

Primary Care Service Support Costs Payment team
