Prices include card reader for secure print release functionality which can reduce wastage by >30%. All MFDs will be networked. Click charges cover replacement consumables and engineer call-outs.

Uniflow (management information software) is included where appropriate. For purchased devices that have the Uniflow software, there is a quarterly support charge of £5.94

All devices provide duplex print. VAT not included in pricing models

Devices are supplied under framework agreement CCS RM6174 Lot 2.

The Sustainable Print policy mandates the use of MFDs over desktops for reasons of confidentiality and waste reduction, so personal printers are not supplied. There is a limited number of Canon desktop printers available for short-term loan. Contact sustainable-print@bristol.ac.uk for details of availability.
