Genomics for African *Anopheles* Resistance Diagnostics in a network KENYA - TANZANIA - IVORY COAST - GHANA - BENIN

SUSTAINABLE DEVELOPMENT GOAL 3: GOOD HEALTH & WELL-BEING

Methodology

- Development of a sustainable Sub-Saharan African-led network of vector biologists;
- Design, implementation and analyses of genomic studies of malaria vectors to understand the evolution of insecticide resistance and its impact on control.

Aims for Symposium

- We would like to hear from any potential collaborators in order to increase our network and achieve a greater diversification of results.
