Multi-Disciplinary Research in KEMRI, Kenya CECILIA MBAE, PhD

In Search of Better Health

KEMRI

Background

The Kenya Medical Research Institute (KEMRI) is a state corporation established through the Science and Technology (Amendment) Act of 1979, which has since been amended to Science, Technology and Innovation Act, 2013.

The 1979 Act established KEMRI as a National body responsible for carrying out health research in Kenya. It spells out the mandate and responsibilities of KEMRI

Mandate

- 1. To carry out research in human health.
- 2. To cooperate with other research organizations and institutions of higher learning on matters of relevant research and training.
- 3. To liaise with other relevant bodies within and outside Kenya carrying research and related activities.
- 4. To disseminate and translate research findings for evidence based policy formulation and implementation.
- 5. To cooperate with the Ministry responsible for Health, the National Commission for Science, Technology, and Innovation, and the Medical Sciences Advisory Research Committee in matters pertaining to research policies and priorities.
- 6. To do all such things as appear to be necessary, desirable or expedient to carry out its functions.

VISION

To be a leading Centre of Excellence in Research for Human Health.

MISSION

To Improve Human Health and Quality of life through Research, Capacity Building, Innovation and Service Delivery.

KEMRI RESEARCH CENTRES, UNITS AND LOCAL COLLABORATING INSTITUTIONS

INTERNATIONAL COLLABORATORS - Japan International Cooperation Agency (JICA) - Kanazawa University - Nagasaki University **United States of America** - Centres for Diseases Control and Prevention (CDC) - Walter Reed Army Institute of Research **REGIONAL** Tanzania - Liverpool School of Tropical Medicine - Commonwealth Regional Health Secretariat - London School of Hygiene and Tropical Medicine For East, Central and Southern Africa - National Institute of Medical Research, Tanzania Uganda (United Nations Agencies - Makerere University Medical School - World Health Organisation (WHO) - Virus Research Institure Ethiopian Canada - Health and Nutrition Research - Lawson Health Research Institute - Addis ababa University Germany - Gondar University - Medicines San Frontiers International South Africa - Institute of Virological Research - Drugs For Neglected Diseases Initiative (DNDi) - Medical Research Council, Australia Ghana - Bois Initiative - Oswaldo Cruz Foundation - Noguchi Memorial Research Institute Zambia Austria - University of Zambia, Medical School - Royal Tropical Institute of Amsterdam - International Atomic Energy **Zimbabwe** Agency (IAEA) - Blair Institute - Indian Council of Medical Research Egypt - Suez Canal University - Institute of Endemic Diseases, University of Khartoum

INTERNATIONAL

United Kingdom

Thailand

Brazil

India

Switzerland

Netherlands

- Wellcome Trust

- Mahidol University

Japan

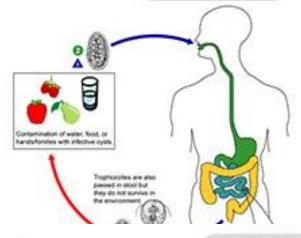

Infectious and Parasitic Diseases Programme

Non-Communicable Diseases Research Programme

Cardiovasculor Disease

Cancer

Diabetes

Chronic Respiratory Diseases

Products & Services

- Through our Production Unit we have developed a number of products such as;-
- HEPCELL rapid, KEMCOM Rapid, TB-cide, Kem-TAQ, KEM-rub SafiKem etc.

Services

- DNA
- Ethical Review for protocols
- Conference Facilities
- Incineration services
- Cancer Registry
- Rapid Emergency response & disease surveillance
- Clinical Laboratory diagnostic services

Other Services

- **Human identification** to the public and the military
- **Deworming** over 6M school-age children from 28 counties in Western, Nyanza, Rift Valley and Coast regions are dewormed annually since 2012 by KEMRI, MoE and MoH. KEMRI is monitoring impact of treatment in 200 schools from 16 counties in these regions

Diagnostics

- Outbreaks to the nation and the region
- Specialized affordable services (being revamped)

Products

- Diagnostics hepatitis, HIV, Rift valley fever
- Hand wash- supplying to KEMSA
- Antiseptics Supplying to KEMSA

Achievements

- ► KEMRI is the Medical Research arm of the Government and provides advice to the Ministry on various aspects of healthcare and delivery.
- National diseases surveillance and rapid response capacity for major disease outbreaks (cholera, chikungunya virus, H1N1 flu, yellow fever, rift valley fever, Ebola, aflatoxicosis etc)
- New treatment for leishmaniasis
- Involved in research that led to the current anti Tuberculosis treatment
- ▶ Involved in the malaria vaccine that the country is about to role out (pilot)
- National cancer registry
- Many of our scientists have received national and international accolade

International Recognition and Initiatives

- ▶ WHO designated Centre's of Excellence in the following:-
- NTD
- Malaria & Ebola Vaccine Trials
- Nutrition and Virology
- ► HIV/Aids
- ▶ Polio, Measles, Anti microbial Resistance
- ANDi,
- > DNDi, Africa Regional Office
- ► TB and lung diseases regional centre
- Clinical Trials (GCP)
- ▶ Regional centre for Emerging & Re-emerging diseases and climate change.

International Recognition and Initiatives

- Regional laboratory capacity building in operation research under the East African Public Health Laboratory networking project (EAPHLN).
- ▶ WHO designated International Training Center to implement capacity strengthening training courses to support Neglected Tropical Diseases (NTDs) control Programmes.
- ▶ WHO designated Centre of excellence in Malaria, Nutrition and Virology
- ▶ World Health Organization (WHO) Collaborating Centre for HIV/AIDS, Tropical Diseases Research, Polio Immunization, Viral Haemorrhagic Fevers and Anti-Microbial Resistance (WHO-NET).
- ▶ USA National Research Council recognized training institute for postdoctoral and senior research awards
- ➤ The Africa Regional headquarters for Drugs for Neglected Diseases Initiative (DNDi).

Integrating geographical and genetic mapping of salmonella disease in an endemic site in Kenya

- Evaluate the overall incidence of invasive NTS, NTS diarrhea, and TF; spatial and spatiotemporal clustering of these infections and their constituent genotypes.
- Evaluate the transmission of NTS and TF asssessment of personal, household, and environmental risk factors
- Evaluate the incidence and prevalence of antibiotic resistance among NTS and TF isolates

MUKURU SLUMS- NAIROBI CITY

Possible areas of collaboration with KEMRI scientists

- Infectious diseases- in relation to one health, AMR, STIs, HIV (Bacterial, viral, fungal, parasitic infections)
- Drug discovery- Use of natural products
- NCD's- Cancer remains a big threat in the country, no basic research ongoing
- All areas of research

THANK YOU
