

Optimising recruitment into surgical RCTs

A focused workshop for surgeons

10.30am - 4pm
Friday 12th January 2018

Bristol Medical School, University of Bristol, Canynge Hall, 39 Whatley Road,
Bristol BS8 2PS
Room LG.08

An interactive workshop to enhance surgeons' skills in recruiting patients to randomised controlled trials involving surgery

Why the need for randomised trials?

Key information to convey to potential trial participants

Addressing hidden challenges of trial recruitment

Providing balanced information on treatment options

Dealing with patients' treatment preferences

Places are limited so please book early

For further information and to register please contact: Nicola.Mills@bristol.ac.uk

This workshop is aimed at surgeons and trainees who are actively consenting patients to an RCT involving surgery, or those who plan to do so in the near future.

This course is free. We are unable to cover travel or accommodation costs.

Workshop funded by the UK MRC ConDuCT-II Hub for Trials Methodology Research
