

Fire safety guidance for the use of e-bikes on University premises

This guidance is under further scrutiny and is subject to revision. In the meantime:

- Do not bring e-bikes into buildings except internal cycle parking facilities
- E-bike batteries may be brought into buildings (other than internal cycle parking facilities) ONLY when in a fireproof case
- Batteries should be stored in fireproof cases in a cool dry place away from direct sunlight
- Batteries must NOT be charged in university buildings.
